Operative note - left forearm AV graft

Patient	Brooks, Angela	**MRN**	MRN-100008
Date of birth	1972-05-09	**Date**	2026-08-25
Author	Dr. Daniel Brooks, Vascular Surgery	**NPI**	1333444556

Procedure

Creation of a left forearm loop arteriovenous graft (CPT 36830), 6 mm PTFE.

Indication

ESRD, new start on hemodialysis. Vein mapping showed forearm and upper arm veins too small for a fistula.

Description

Under regional block the brachial artery and antecubital vein were exposed. A 6 mm PTFE graft was tunneled in a loop on the forearm and sewn end-to-side to the artery and the vein. Good thrill at the end of the procedure. Blood loss 20 mL. No complications.

Plan

Graft may be cannulated after 3-4 weeks. Keep the arm elevated, no blood pressure cuffs on the left arm.

Electronically signed by Dr. Daniel Brooks on 2026-08-25.
